

# Advanced Operator Training

Maximizing Consistency with Domino N610i

N610i Digital UV Inkjet Label Press

Domino. Do more.

# Advanced Operator Training

## Maximizing Consistency with Domino N610i

### Course Description

Advanced training provides customers the skills to diagnose and repair common hardware problems with the N610i Digital Press. When used in conjunction with Domino Help Desk customers have the skills and tools to minimize repair time. Ideal candidates will also have completed the Domino Operator Training course and have operated a press for a minimum of 6 months. The training is only focused on the Domino inkjet press hardware. Please contact your Domino representative for any additional training questions.

Domino makes it easy for you to 'do more' and get more with our Advanced Operator Training. The class lets the more experienced N610i customers have more control with some repair and advanced maintenance on their printer!

### Course Goals

By the end of class the student will have reviewed best-practices for operation and maintenance tasks. They will be able to diagnose first-level problems associated with the ink system and understand when a part-swap is required.
