Maximizing Color Knowledge with Domino N6I0i

Domino. Do more.

Digital Front End Training

Maximizing Color Knowledge with Domino **N6I0i**

Course Description

This course is designed for color management persons to gain hands on training using the **N6I0i** Digital Front End (DFE) process. The course will provide color management persons basic skills and knowledge of the DFE and process jobs through it for use on the press. Class time will focus on the hands-on learner and give opportunities for each student to operate and familiarize themselves with the setup of color profiles, processing of jobs for the press, color matching, and DFE maintenance. Classes will be capped at 4 students to provide for enough hands-on time.

Course Goals

- Familiarity with press operations
- Basic use of the DFE
- Understand concepts of DFE components
- Build color strategies and adjust color
- Build material and process print jobs

Course Activities

- Basic press operation
- Substrate setup & settings
- Creating & sending print jobs
- Color profiling process
- Hot folder/ticket setup
- Spot color and ink book functionality
- Color refinement
- Use of spectro
- Practical exam

Domino makes it easy for you to 'do more' and get more with our **N6I0i** Digital Front End Training Class. Working with medias and color on a new digital press often comes with a learning curve. Let the DFE class guide your color people to become a N6I0i color experts!
